Extracto

I have experience in programming because I am a student of mathematics and physics. It has provided me with skills to develop regression models for various types of data. I'm still learning advanced python (jupyter notebook) focused on data science (various types of libraries such as: pandas, matplotlib, seaborn, tensorflow focused on machine learning) and also other programming languages such as basic c++, JavaScript, Matlab, etc.

Experiencia

Profesional independiente

Analista de datos

febrero de 2022 - Present (8 meses)

Autónomo

Científico de datos

enero de 2021 - agosto de 2022 (1 año 8 meses)

Educación

Universidad Nacional de Trujillo

Physics, Physics · (abril de 2020 - abril de 2024)
